PROFESSIONAL EXPERIENCE

Junior Developer
Heptic.it | Remote
July 2025 – Present

- Engineered and deployed the company website using FastAPI and Docker, improving deployment speed and system scalability.
- Developed a BOM Manager desktop application using PyQt and SQLite, reducing manual tracking errors by 60% through automated Excel integration.
- Delivered a client-facing web platform using React and Astro.js, achieving 40% faster load times and significantly enhancing SEO performance.
- Designed a Worklog application with PostgreSQL and ShadCN UI, improving internal task visibility and team productivity.

PORTFOLIO PROJECTS

Blockforge (Full-stack Web Application)

- Designed a marketing platform for a Web3 SaaS company, optimizing user flows to increase lead generation by 40%.
- Implemented dynamic interfaces using React and Framer Motion, resulting in a high-performance front-end experience.

Cognito (Full-stack SaaS Platform)

- Built a real-time collaborative platform using Next.js and Supabase, supporting 10+ simultaneous users with secure authentication.
- Integrated Stripe payments and subscription management, enabling secure storage for 500+ notes and multi-tier pricing plans.
- Achieved 99% responsive UI coverage across mobile and desktop devices using TailwindCSS.

EDUCATION

Bachelor of Science in Computer Science
Virtual University of Pakistan, Karachi

CERTIFICATIONS

- **Google Cloud Associate Cloud Engineer** (Issued: August 2024)
