July 2025 – Present

- Designed and maintained 10+ backend APIs for internal and client-facing applications, improving data reliability and cutting average response time by ~30% through query optimization.
- Built database-driven features across 5+ product modules using SQL/ORMs, eliminating manual data operations and reducing data-entry errors by an estimated 40%.
- Implemented JWT-based authentication, authorization, and role-based access control (RBAC) across 3 application layers, closing critical security gaps and aligning with OWASP best practices.
- Resolved 20+ recurring production bugs across backend and frontend layers, improving application uptime and reducing support escalations by ~50%.
- Collaborated with product, frontend, and QA teams in a remote agile environment to ship 6+ features end-to-end.
