

Work Experience

Junior Software Engineer	Heptic.it Remote	July 2025 – Present
- Engineered backend APIs using Python and FastAPI with structured validation, reducing production data inconsistencies by 50% and improving reliability for 300+ daily transactions. - Implemented internationalization (i18n) across Next.js front-end interfaces, supporting 2 new global locales and reducing localization-related bug reports by 85%. - Maintained Git-based version control and automated CI/CD pipelines, achieving zero-downtime feature deployments across bi-weekly agile sprint cycles. - Drove technical SEO initiatives utilizing semantic markup, structured data, and performance-optimized rendering, improving Google Lighthouse page quality scores by 40% and boosting organic discoverability. - Integrated Stripe and Moyasar payment gateways into production web platforms, enabling secure multi-currency transactions and decreasing checkout failure rates by 50%.		

Projects

HR SaaS Platform Python, FastAPI, Next.js, PostgreSQL, Docker
- Built a full-stack web application delivering a responsive, multi-role interface for attendance tracking and leave workflows for a user base of 100+ employees. - Engineered role-based access control (RBAC) and real-time analytics dashboards, reducing administrative reporting time by 30%. - Containerized the application with Docker Compose for zero-drift deployments, achieving sub-100ms API response times across all core operations. - Designed PostgreSQL data ingestion pipelines and reporting workflows to support complex, multi-table querying at scale.
Bill of Materials Management Platform Python, PyQt, SQLite, Pandas
- Built an Excel-to-SQLite ETL pipeline using Pandas, automating Bill of Materials (BOM) generation and invoice creation from a centralized database. - Designed a normalized relational database schema, enabling efficient multi-table queries across inventory, billing, and reporting modules. - Eliminated manual data entry by automating invoice workflows, reducing processing time by 8 hours per week and improving billing accuracy to 95%.

Education and Certifications

Bachelor of Science in Computer Science, Virtual University of Pakistan, Karachi.	June, 2025
McKinsey Forward Program	Dec, 2025
Oracle Cloud Infrastructure Foundations Associate	Oct, 2025
Google Cloud Associate Cloud Engineer	Aug, 2024

Technologies and Languages

Languages: Python, JavaScript, SQL, HTML/CSS
Frameworks: React, Next.js, FastAPI, Astro.js
Tools: Git, Docker, Google Cloud Platform (GCP), Linux, CI/CD
Design & Architecture: Figma, RESTful APIs, Relational Database Design
