

Work Experience

Junior Software Engineer	Heptic.it Remote	July 2025 – Present
- Built responsive frontend web interfaces using Next.js, TypeScript, TailwindCSS, and ShadCN/UI by translating Figma design mockups to improve onboarding flow and user engagement. - Led the English and Arabic internationalization (i18n) configuration using Next.js and custom RTL CSS layouts across core application routes to support native-language users and reduce localization bugs by 50%. - Engineered secure RESTful APIs with FastAPI, incorporating robust authentication layers and complex role-based access control (RBAC) to protect sensitive application endpoints and data.		

Projects

HR SaaS Platform Python, FastAPI, Next.js, PostgreSQL, Docker
- Developed a full-stack multi-role web application using Python, FastAPI, Next.js, and Docker to automate employee attendance tracking and streamline administrative HR workflows. - Implemented a real-time notification system using Redis Pub/Sub, FastAPI, and WebSockets to deliver instant system updates across live user sessions and eliminate unnecessary server polling overhead. - Designed relational database schemas and reporting pipelines in PostgreSQL to support complex multi-table business querying and reduce database load times.

Bill of Materials Management Platform Python, PyQt, SQLite, Pandas
- Built an Excel-to-SQLite ETL pipeline using Pandas, automating bill generation and invoicing from a centralized SQLite database. - Designed a normalized relational database schema to streamline queries across inventory, billing, and reporting modules. - Automated invoicing workflows to eliminate manual data entry, reducing processing time by 8 hours per week and raising billing accuracy to 95%.

Education and Certifications

B.S. in Computer Science	Virtual University of Pakistan, Karachi Graduated: June 2025
Google Cloud Associate Cloud Engineer	Google Cloud Aug 2024
Oracle Cloud Infrastructure Foundations Associate	Oracle Oct 2025
Python Data Associate	Datacamp June 2026

Skills and Technologies

Languages & Backend: TypeScript, JavaScript, Python, SQL, HTML/CSS, Node.js, FastAPI
Frontend Frameworks: React.js, Next.js, TailwindCSS, Astro.js, ShadCN/UI
DevOps, Tools & Cloud: Git, Docker, CI/CD, Linux, Google Cloud Platform (GCP), Oracle Cloud Infrastructure (OCI)
