

# SYED UMAIR ALI

## Full Stack Software Engineer

[syedumairali.617@gmail.com](mailto:syedumairali.617@gmail.com) | +92-310-1123705 | [linkedin.com/in/syedumaircodes](https://linkedin.com/in/syedumaircodes) | [github.com/syedumaircodes](https://github.com/syedumaircodes)

### SUMMARY

---

Full Stack Software Engineer building production-grade web applications — from REST APIs to full cloud deployments. Drove 50%+ of feature delivery and reduced application bugs by 30% through stronger backend architecture and cleaner API design. Stack: Python, FastAPI, Next.js, TypeScript, PostgreSQL, Docker, GCP.

### WORK EXPERIENCE

---

#### Junior Software Engineer | Heptic July 2025 – Present

Remote

- Drove 50%+ of feature delivery across client-facing and internal web apps, shipping production-ready code with Next.js, FastAPI, and REST APIs within tight sprint cycles.
- Reduced application bugs by 30% by redesigning backend error handling, adding input validation layers, and improving API documentation across services.
- Led English/Arabic internationalization (i18n) using Next.js and custom RTL CSS layouts, reducing localization-related bugs by 30%.
- Engineered secure RESTful APIs with FastAPI, implementing authentication and role-based access control (RBAC) to protect sensitive endpoints.
- Integrated Stripe and Moyasar payment gateways, enabling secure multi-currency transactions and reducing checkout failure rates by 50%.
- Collaborated in an Agile team — sprint planning, code reviews, and CI/CD achieving zero-downtime deployments.

### PROJECTS

---

#### HR SaaS Platform | Python, FastAPI, Next.js, PostgreSQL, Docker

- Developed a full-stack multi-role web application to automate employee attendance tracking and streamline administrative HR workflows.
- Implemented a real-time notification system using Redis Pub/Sub, FastAPI, and WebSockets to deliver instant updates and eliminate unnecessary server polling.
- Designed relational database schemas and reporting pipelines in PostgreSQL to support complex multi-table business querying and reduce load times.

#### Bill of Materials Management Platform | Python, PyQt, SQLite, Pandas

- Built an Excel-to-SQLite ETL pipeline using Pandas, automating bill generation and invoicing from a centralized SQLite database.
- Designed a normalized relational database schema to streamline queries across inventory, billing, and reporting modules.
- Automated invoicing workflows, reducing processing time by 8 hours per week and raising billing accuracy to 95%.

### EDUCATION

---

#### B.S. in Computer Science | Virtual University of Pakistan, Karachi Graduated: June 2025

### CERTIFICATIONS

---

- Google Cloud Associate Cloud Engineer — Google Cloud, Aug 2024
- Oracle Cloud Infrastructure Foundations Associate — Oracle, Oct 2025
- Python Data Associate — DataCamp, June 2026 (in progress)

### SKILLS AND TECHNOLOGIES

---

**Languages & Backend:** TypeScript, JavaScript, Python, SQL, HTML/CSS, Node.js, FastAPI

**Frontend Frameworks:** React.js, Next.js, TailwindCSS, Astro.js, ShadCN/UI

**DevOps, Tools & Cloud:** Git, Docker, CI/CD, Linux, Google Cloud Platform (GCP), Oracle Cloud Infrastructure (OCI)
