

Work Experience

Junior Software Engineer	Heptic.it Remote	July 2025 – Present
- Built responsive frontend web interfaces using Next.js, TypeScript, TailwindCSS, and ShadCN/UI by translating Figma design mockups to improve onboarding flow and user engagement. - Led the English and Arabic internationalization (i18n) configuration using Next.js and custom RTL CSS layouts across core application routes to support native-language users and reduce localization bugs by 50%. - Collaborated with design and backend engineering teams in sprints using Git workflows to build a reusable component architecture with React and TypeScript, streamlining feature delivery times by incorporating peer feedback. - Optimized technical SEO and application performance on public-facing landing pages to raise Google Lighthouse scores by 30% and increase organic traffic.		

Projects

HR SaaS Platform Python, FastAPI, Next.js, PostgreSQL, Docker
- Developed a full-stack multi-role web application using Python, FastAPI, Next.js, and Docker to automate employee attendance tracking and streamline administrative HR workflows. - Implemented a real-time notification system using Redis Pub/Sub, FastAPI, and WebSockets to deliver instant system updates across live user sessions and eliminate unnecessary server polling overhead. - Designed relational database schemas and reporting pipelines in PostgreSQL to support complex multi-table business querying and reduce database load times.
Blockforge – Web3 Service Provider React, Astro.js, TailwindCSS, Framer Motion
- Developed a server-rendered marketing and blog platform using Astro.js, React, and file-based MDX to eliminate backend database dependencies entirely and achieve fast page-load speeds for startup users. - Created a library of reusable React components using Tailwind CSS utility classes across the entire web application to maintain consistent typography and visual layouts. - Integrated interactive UI transitions and animations using Framer Motion and CSS to translate complex design mockups into polished user experiences that improved user retention.

Education and Certifications

B.S. in Computer Science	Virtual University of Pakistan, Karachi	Graduated: June 2025
Google Cloud Associate Cloud Engineer		Google Cloud Aug 2024
Oracle Cloud Infrastructure Foundations Associate		Oracle Oct 2025
McKinsey Forward Program		McKinsey & Company Dec 2025

Skills and Technologies

Languages & Backend: TypeScript, JavaScript, Python, SQL, HTML/CSS, Node.js, FastAPI
Frontend Frameworks: React.js, Next.js, TailwindCSS, Astro.js, ShadCN/UI
DevOps, Tools & Cloud: Git, Docker, CI/CD, Linux, Google Cloud Platform (GCP), Oracle Cloud Infrastructure (OCI)
