

Work Experience

Junior Software Engineer	Heptic.it Remote	July 2025 – Present
- Built responsive frontend interfaces using Next.js, TailwindCSS and ShadCN/UI, translating design mockups into clean TypeScript code. - Led the English and Arabic internationalization (i18n) setup in Next.js, building out custom RTL layouts and reducing localization bugs by 85%. - Maintained clean, reusable component architecture across sprints, collaborating with design and backend teams using Git-based workflows. - Optimized technical SEO and site performance through semantic HTML and server-side rendering, raising Google Lighthouse scores by 40%. - Collaborated closely with designers to ensure pixel-perfect implementation, maintaining visual consistency across all responsive breakpoints.		

Projects

HR SaaS Platform Python, FastAPI, Next.js, PostgreSQL, Docker
- Developed a full-stack web application featuring responsive, multi-role dashboards for employee attendance tracking and HR workflows. - Implemented Redis Pub/Sub for real-time notifications, delivering instant updates across user sessions without polling. - Built multi-role dashboards with responsive, component-driven UI using React and Next.js, supporting real-time attendance tracking and HR workflows. - Designed PostgreSQL database schemas and reporting pipelines, optimizing index strategies to support efficient multi-table querying.
Blockforge – Web3 Service Provider Astro.js, React, Tailwind CSS, Framer Motion
- Built a full-stack marketing and blog platform for a Web3 SaaS startup using Astro.js with file-based MDX routing, eliminating the need for a backend database entirely. - Developed reusable React components at scale, enforcing design consistency across all pages using Tailwind CSS utility classes. - Implemented subtle UI animations with Framer Motion, translating design intent into polished, interactive user experiences.

Education and Certifications

Bachelor of Science in Computer Science, Virtual University of Pakistan, Karachi.	June, 2025
McKinsey Forward Program	Dec, 2025
Oracle Cloud Infrastructure Foundations Associate	Oct, 2025
Google Cloud Associate Cloud Engineer	Aug, 2024

Technologies and Languages

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS
Frameworks: Node.js, React, Next.js, TailwindCSS, FastAPI, Astro
Tools & Infrastructure: Git, Docker, Cloud Platforms, Linux, CI/CD
Architecture & Design: Relational Database Design, REST APIs, Figma
